@PAULBROMFORD

@BROMFORDLAB

We had a hunch – without much evidence at the time – that if we simply believed in our people and **took away all of the bureaucracy** they'd have conversations with residents and make the right decisions

1 – Using design thinking to align teams around principles of simplicity

2 – Creating the right conditions for collaboration and getting leaders on board

3 – The use of digital tools to increase transparency across organisations and to the general public

Phil. S. Ensor coined the term the functional silo system. His contention was that narrow, specialised teams and jobs were easy to manage but imposed a **very damaging learning disability** on the organisation.

A woman with blonde hair, wearing glasses and a black and white striped shirt, is standing in profile, writing on a whiteboard with a black marker. The whiteboard has some faint, illegible text on it. The background is a blurred office or classroom setting.

If we don't teach, measure,
encourage or reward
collaboration **it doesn't tend
to happen**

“Collaboration is an essential skill of the digital economy. And yet how to collaborate productively is hardly ever taught either in universities or in the workplace.” – Gerry McGovern

The more interdependent the world becomes, the less it needs lone problem solvers and the more it needs **great collaborators and orchestrators**

Girls outperform **boys** in collaborative problem solving
OECD countries and top performer Singapore

The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

**Creating the conditions
for collaboration and
getting leaders on
board**

Our DNA.

We uncovered our DNA by talking to our people; by asking them why Bromford is special for them, what makes us different and how we should operate in the future.

We held over 30 workshops in the summer of 2018 across our whole new operating area with nearly 500 colleagues attending and giving their views. Colleagues drafted what came out of the sessions. A further 10 workshops were then held with nearly 200 people attending. From these the final wording of our values, or as colleagues preferred to call them, our DNA, emerged. It is by colleagues working together that we will bring the DNA to life as it comes to inform all that we do and the way that we do it.

CHALLENGED
AND TO
CHALLENGING
OTHERS

YOU DO WHAT
YOU SAY YOU
WILL

YOU LEARN
FROM MISTAKES
AND ARE OPEN
WHEN THINGS
GO WRONG

DESIGN THINKING AND LEADERSHIP AT BROMFORD

BE BOLD

#LeadChange - Be confident. Be comfortable with ambiguity. Start with just enough insight and build on it as you go. Manage risk, rather than avoid it. Leave your ego at the door and collaborate; it's a team sport.

BE BRILLIANT

#DeliverResults - Be curious. Be collaborative. Start and end with people. Takes you from a position of thinking to a position of knowing. Enables better (more informed) decision making. Empower and inspire people to think differently.

BE HONEST

#DrivePurpose - Be comfortable admitting you don't have all of the answers. Be empathetic. Learn to see things through different sets of eyes. Look for insight and inspiration everywhere. Link to strategy. Celebrate your failures and learn from them.

BE YOU

#UnlockPotential - Be more in love with problems than solutions. Focus on why, not what or how. Motivate and inspire. Combine logic and emotion. Focus on relationships. Coach the project team; do with not for.

Keeping Bromford future ready.

In 2017 we embarked on an ambitious programme to transform the way we work, and at the start of 2018 we signed an agreement with Microsoft and HCL to become our delivery partners. At the heart of the programme is a goal of increasing organisational capability through the simplification of our processes and ways of working. We will also move to a small number of integrated systems used across the whole of the new organisation, enabling clear efficiencies to be delivered as set out in the business cases to bring the three legacy organisations together. Importantly, the new ways of working enabled by the systems are scalable too.

Between now and the end of 2023 our ambitious goals are:

Goal	How we achieve this	How we will measure progress	
		End of 2020	End of 2023
We want to deliver a Bromford where there is a simpler more consistent experience for customers and colleagues	Through the delivery of programme One	We will have delivered key technology milestones of programme One as set out in the Business Case	
		73% of programme outcomes achieved	100% of programme outcomes achieved
		Cashable benefits will total £3.4m	Cashable benefits will total £28.4m
		Colleagues who believe the programme has delivered its objectives 80%	Colleagues who believe the programme has delivered its objectives 95%
We want to effectively integrate old Bromford, Merlin and Severn Vale into one organisation	Through a well-designed and executed Integration Project Plan	We will have completed the integration phase of the two business cases	We will be realising an annual saving of at least £5.2m
We want to explore the extra value we can deliver to our customers through the use of their data both at an individual and community level	By establishing one or more partnerships with organisations to share our data with to the benefit of customers directly or indirectly	A customer value metric to be determined in the future	A customer value metric to be determined in the future
	By using our customer data to inform a pipeline of service improvements		
We will have the workspaces we need to deliver the services that enable us to achieve our strategy	We will formulate and execute a workspaces plan that allows the business to deliver effectively the services our customers and colleagues need	We'll have a plan in place to improve the quality of how we work from a much smaller footprint	We'll have implemented our plan, reducing our workspace by >40,000 sq ft but creating great workspaces for colleagues

**Using technology to
boost transparency
with the organisation
and public**

Bad News: it means moving away from email

The emphasis on new technology to moderate our workdays isn't necessarily making our work better or making us more productive

We need **new behaviours** not just new tools

WORKING OUT LOUD

Open working builds public trust

Urgent This Week

Meet with Steve Phillips and map out testing plan (role of Innovation - if any possible . Copy over to Paul C and John Wade

May 2

IoT notes out with outline of position statement - agree with team before circulation to Martyn Blackman and DTA

May 1

Session Draft circulated to Amy Nettleton and Asif Choudry

Apr 30

Check through service design slides for amends and circulate to Sara

May 2

COMPARING TWO TWITTER NETWORKS

Although employees A and B follow approximately the same number of Twitter accounts, A's network is far more diverse than B's. For the most part, the people employee A follows are not following each other, which is more conducive to innovation and better idea generation. Compact Twitter networks like employee B's provide redundant information and are less conducive to ideation.

Employee A's Twitter Network

Employee B's Twitter Network

Joy's Law: the principle that no matter who you are, most of the smartest people work for someone else

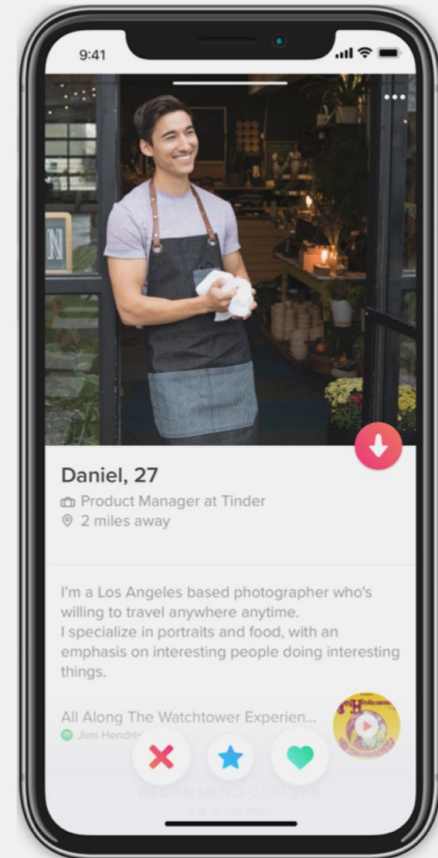

THE CHALLENGE

A week last Sunday evening, more than 6 million people gathered online via streaming services such as Twitch and YouTube to watch **the end of the world**

40% of people will meet their future partner online, **not in a physical community**

How lonely are Europeans?

Loneliness is measured with two indicators:

- 1** *Lonely individuals* are those who report feeling lonely 'most of the time', 'almost all' or 'all of the time' in the past week

- 2** *Socially isolated individuals* are those who meet socially with friends, relatives or work colleagues at most once a month

7% frequently feel lonely

18% meet others at most once a month

of all Europeans aged over 15

Eastern and Southern Europeans are lonelier and more socially isolated than Western and Northern Europeans

Teaches children to swim & sail

Knows about the tides & water safety

Produces local newsletter

Volunteer driver

Doing a course in sign language

Cattle Carer
Raised 11 children

Unemployed sous chef

Ranger

Good at catching, cooking & eating fish

Happy to drive others in to town

Community warden

I.T. Expert

Green Fingers

Events organiser

Tells people about local walks

Bee keeper

Retired lawyer part-time advocate

Artist

Scout leader

student

animator

Knows all about nature

Mushroom forager

Campaigns for more cycleways

Barmaid who listens to people

Helps son

Helps mum

WINNER Britain In Bloom

Looks after grandchildren

Business manager

Set up a social enterprise

Knows everyone loved by all

Speaks three languages

Worked in travel before having children

Hospital porter

Organises Estate parties

Librarian

Great at motivating others

Knows everything that goes on here

Hairdresser who notices changes in people

Has been a social worker for 20 years plays jazz guitar

A mentor

Tells people about memory club

Trained actor

Wild swimmer

Runs parents support group

Ex-carer who now helps other carers

Works in construction, cares for mother

Was in the Falklands war

Volunteers manage the cafe

Runs a car club

Care worker

Good at fixing cars

Helps neighbour go shopping

Good with money

Helps run online support group

Babysitter

Helps with book club

HOSPITAL

Keeps riverbank clean

Helps people with their boats

Good at upcycling

Writes poetry sleeps rough

Runs art festival

Learning to use public transport

Teaches Indian cooking

Knows about local history

Mentoring young person despite stage III cancer

Freelance journalist

Carer

Recently graduated

Has done the London 'Knowledge'

Friendly elected member

Looks after cemetery

Works in office

SCHOOL

Coach

Loved by locals

Unemployed manager

Community Health champion

Good at connecting people

Organises trips to the seaside

Runs Facebook Job Club

Excellent project manager

Cooks for a friend

Campaigns for better housing

Part of the Timebank

Helps young people with homework

Studying to be a doctor

Organises Sports club

Helps with new mum's group

Delivers shopping & checks on people

Helps people to apply for benefits

Collects neighbour's newspapers

Learning to make films

Has the best courgettes on the allotment

Knows first aid

Helps with new mum's group

Helps with shopping & checks on people

Helps with shopping & checks on people

Helps with shopping & checks on people

Helps with shopping & checks on people

Helps with shopping & checks on people

Helps with shopping & checks on people

Helps with shopping & checks on people

mandi 2018

How can we use the power of technology to **connect and collaborate at scale** across the public sector?

YOU CAN'T CHANGE THE WORLD
ON YOUR OWN.

BUILD MOVEMENTS.
